

Note: The product images shown may change over time as products are updated.

## Dimensions

## Part Number

GD-TA516-3.2

## Features

- Powerful and very rugged
- Can carry infrared light to provide a longer range
- Reliable in extreme temperatures and harsh environments

## Technical Data

|                       |                                   |
|-----------------------|-----------------------------------|
| Type                  | Glass Fiber Optics                |
| Mode                  | Diffused                          |
| Fiber Bundle Diameter | 3.2 mm                            |
| Viewing Angle         | 90 Degree                         |
| Thread Location       | Tip                               |
| Thread / Material     | 5/16-24 UNF-2A / Brass            |
| Sheath Material       | Stainless Steel                   |
| Length                | 910 mm                            |
| Temperature Range     | -50 ° to 480 °F (-45 ° to 249 °C) |
| Minimum Bend Radius   | 2.5x Sheathing OD                 |
